

DROP ROLLER MACHINE

FOR THE FORMING OF CANDY PIECES

The Loynds table-top drop roller machine is a low-cost solution for producing die-formed hard candy sweets.

The drop roller is a small to medium output machine which requires an element of hands on work for operation.

The candy needs cutting and forming into ribbons which are then fed into the infeed section of the machine where they are automatically pulled through the rollers to output a sheet of formed candy.

Once the sheet cools it can be broken up leaving behind the sweets.

It is advisable to pan and sieve the sweets after forming to smoothen out the appearance of the finished product and remove any webbing left over from the forming process.

A drop roller is the perfect low cost solution to forming candy sweets in low volumes.

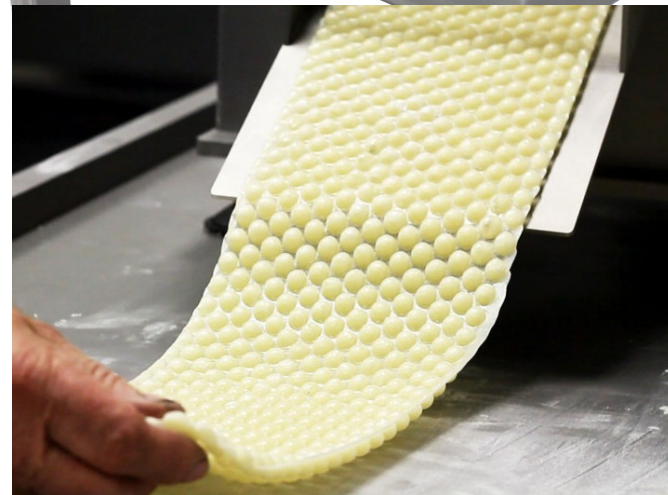

FEATURES

- Stainless steel construction
- Very simple to operate
- SMED (quick change over of dies)
- Variable speed control via inverter.
- Table top machine (standard model)

OPTIONS

- Operator height stand with or without castor wheels
- Additional dies available
- Sieve

DROP ROLLER

SPECIFICATIONS

Overall Height
390mm

Overall Length
650mm

Overall Width
350mm

Material
Machine - 304 Stainless Steel with Bead Blast Finish
Dies – Brass

Output
Up to 1000Kg per shift depending on product size

Weight
Machine = 65Kg

Uses (dependant on product consistency)

- Hard Candy
- Soft Candy
- Toffee
- Caramel
