

Candy Cane / Stick Master production line

Rock candy forming and twisting line for candy canes, twirly pops and rock/pole sticks.

- Batch roller
- Rope sizer
- Two sets of angled twisting conveyors
- Cutting unit
- Single tier cooling conveyor
- Speed: 20–200 cut pieces per minute
- Diameter: 6mm–22mm
- Length: 75mm–1000mm

The machine can also be automated to make straight rock candy bars by the addition of a special bar cooler. These can be fed into a flowpack machine for wrapping. This can achieve speeds of around 200 bars per minute.
