

CANDY PULLING HOOK

AN ESSENTIAL ITEM FOR ANYBODY MAKING CANDY BY HAND. PULLING CANDY ADDS AIR TO THE BATCH AND TURNS IT WHITE / OPAQUE.

Manufactured from full stainless steel, the Candy Pulling Hook is robust, easy to clean and simple to use (as well as keeping you fit!).

The candy batch is first placed over the hook, then the two loose ends are gathered and thrown over it repeatedly. The process continues until sufficient air has been pulled into the batch.

Pulling the batch also turns the candy white / opaque, which is ideal for striping.

The Candy Pulling Hook is supplied in two parts: the back plate is screwed onto the wall and the hook slips easily in and out for easy cleaning.

FEATURES

- Full stainless steel construction ensures a long life and easy cleaning.
- Hook releases quickly from back plate via thumb screw

OPTIONS

- Stainless-steel floor mounted stand
- Wall back plate

Overall Height	240mm	Material	Stainless Steel
Overall Depth	450mm	Output	Depends on use
Overall Width	150mm	Weight	4kg
