

## CUT AND PILLOW PACK MACHINE – CPP01

**DESIGNED FOR CANDY MANUFACTURERS, OFFERING CUTTING, AND PACKAGING FOR A VARIETY OF CANDY PROFILES.**

The Cut and Pillow Pack Machine cuts and wraps hard and soft candies. Equipped with two vertical rope forming wheels that can shape the candy into logs, squares, oblongs, and flats.

Post shaping the piece is cut with the machines integrated nipper knives. The product is then transferred onto a conveyor system where it is fed into the wrapping section. The product is finally wrapped in individual pillow style packs. The machine can cut and wrap at up to 350Pcs per minute depending on the piece size. The machine includes a print registration device for aligning printed film onto the final packs.

Cut and pillow pack machines are typically fed from a Batch Roller and Rope Sizer or an Extruder as part of a fully automatic production line.

For confectioners specialising in longer candy bars, we offer customisation services to accommodate sizes up to 160mm in length. Plus, models with higher operational speeds are available to meet the demands of high-volume candy production.

### FEATURES

- **Capacity:** Up to 350Pcs per minute.
- **Print Registration Device:** for running printed films.
- **Various Product Shapes:** logs, Squares, Oblongs, and Flats.
- **Double Roll Film Holder:** for quick change over of rolls.
