

DROP ROLLER CANDY MACHINES – DR01 & DR02

SUITABLE FOR LOW TO MEDIUM VOLUME ARTISAN CANDY MANUFACTURERS, OR FOR USE IN RECIPE DEVELOPMENT KITCHENS.

The Loynds Drop Roller Candy Machines, including the DR01 (motor driven) and DR02 (hand turned) models, are expertly engineered for artisan candy manufacturers and for use in recipe development kitchens. These machines are uniquely designed to cater to low to medium-volume production, ensuring precision and quality in every batch.

The Loynds Drop Roller Machines feature interchangeable brass forming rollers. This flexibility allows for a broad range of candy shapes to be manufactured using a single machine, significantly enhancing production efficiency. The machine has been designed to facilitate quick and easy changeover of rollers requiring no tools. This is ideal for businesses aiming to diversify their candy offerings without the need for multiple machines.

Both DR01 and DR02 models provide a cost-effective solution for producing die-formed hard candies. These machines are an economical choice for businesses seeking to produce high-quality candies without a significant investment in large-scale machinery.

The rollers can be engraved to create a variety of shapes, including ovals, rounds, balls, oblongs, pears, lemons, flat drops, and other novelty shapes. This allows for customization to meet specific market demands or creative visions. Additionally, you could have multiple shapes engraved onto a single set of rollers.

FEATURES

- **DR01 Capacity:** Up to 125Kg per hour
- **DR02 Capacity:** Up to 25Kg per hour
- **Products:** Hard Candy, Soft Candy, Toffee

DROP ROLLER CANDY MACHINES – DR01 & DR02
