

DROP ROLLER MACHINE-DRO 1

FOR THE FORMING OF HARD CANDY & SOME SOFT CANDIES

The Loynds table-top drop roller machine is a low-cost solution for producing roller-formed hard candy & some soft candy shapes. The drop roller is a small to medium output machine which requires an element of hands-on work.

The candy mass requires cutting and forming into ribbons which are then fed into the infeed section of the machine where it is automatically pulled through the rollers to output a sheet of formed candies are held together by a wafer-thin webbing of candy between each formed candy.

Once the sheet cools it can be broken up leaving behind the sweets. It is advisable to sieve the sweets after forming to smoothen out any sharp edges on the candy and to remove any webbing left over from the forming process.

A drop roller is the perfect low-cost solution to forming candy sweets in low to medium volumes.

FEATURES

- Stainless steel construction
- Very simple to operate, maintain & clean
- Fast die changeover-quick release casing
- Fully guarded and fitted with magnetic guard switches
- Production of up to 150kg is easily achievable in a production shift, Subject to candy size

OPTIONS

- Stainless Steel floor stand with retractable castor wheels
- Additional dies available
- Variable speed

DROP ROLLER MACHINE-DRO1

SPECIFICATIONS

Overall Height
440mm

Overall Length
730mm

Overall Width
520mm

Material

Machine: 304 Stainless Steel
Dies: Brass

Output

Production of up to 150kg is easily achievable in a production shift.
Subject to candy size.

Weight

Machine 64Kg including the weight of the dies at 12.5kg

Products (dependant on product consistency)

Hard Candy
Soft Candy
Toffee
