

MINI CANDY ROPE SIZER – RS02

FOR LOW VOLUME CANDY MANUFACTURERS. PRECISION SIZING FOR CONFECTIONERY MANUFACTURING.

The Loynds RS02 Mini Candy Rope Sizer, an indispensable machine designed specifically for low volume candy manufacturing. The machine has been designed to take up an extremely small footprint while still maintaining the same functionality you would expect from a normal sized rope sizing machine.

Due to its small footprint, the machine is popular for use in recipe development kitchens, “product demonstration” manufacturers, low volume manufacturers as well as for use in the manufacturing of cannabis infused confectionery.

Built in England with a commitment to durability, our rope sizer is manufactured from a robust 304 food grade stainless steel construction, featuring a glass bead finish for optimal hygiene. Designed for longevity, the RS02 operates on a motor gearbox unit enhanced with an electronic variable speed control, ensuring accuracy for both candy and caramel sizing applications.

FEATURES

- Capacity: 125Kg per hour.
- Designed for recipe development and low volume manufacturing.
- Ideal for product demonstrations and training purposes.
- Full 304 stainless steel body for lasting performance.
- Electronic variable speed for precise control.
- Includes 2 pairs of adjustable sizing rollers built to your product size.
- Independently adjustable rollers for precision sizing.
- Optional floor stand available for versatile setup.
