

Candy Process Equipment

Ball Cutter / Disc Logo Cutter

For Logo Design Candies, Logs, Starlight Mints & balls.

The Logo Candy Disc Cutting Machine is excellent for the cutting of rock candy with or without Logos into perfectly formed discs. Any designs such as fruits, faces or lettering running through the centre will be neatly cut once the candy has been cut. The machine ensures that each candy disc is the same size and will leave the edges of the candy rounded. The cutters are slitting wheels.

For Balls

The Ball Candy Machine is excellent for the cutting of hard candy or caramel into perfectly formed ball shapes. The machine ensures that each candy ball is the same. Cutters are forming rollers. Disc cutters and ball cutters are interchangeable in the same machine.

Two Models available 800mm wide cutters & 1000mm wide cutters, for design work use 800mm cutters.

Features
