

BAGGING EQUIPMENT

CHECK WEIGHER

AUTOMATION TO ENSURE YOUR FINAL PRODUCT WEIGHT IS WITHIN TOLERANCE RANGES

End of line machine for the automatic checking of products to make sure they are not over / under weight.

Products that are not within the set weight parameters will be automatically rejected.

A variety of reject mechanisms are available, depending on your product type.

The machines are manufactured from full stainless-steel and are rated IP55.

High precision load cells.

Belt speeds adjustable. 50 product presets can be saved in the machine and these are easy to edit and recall.

Controls are all via an easy to use touchscreen interface.
