NON STICK HOT TABLE REPLACEMENT SURFACE MATERIAL – SC01

FOR COVERING HEATED WORK SURFACES IN YOUR CONFECTIONERY MANUFACTURING PRODUCTION AREA

Our non-stick material is an essential solution for covering heated work surfaces in the confectionery industry. Designed with the highest hygiene standards in mind, this product offers reliability and convenience for professionals working with various confectionery products.

Its material properties make it particularly suited for environments where work with sticky products is happening and hygiene is paramount.

FEATURES

- **Food Grade Quality:** The material is manufactured from 100% food-grade certified polyurethane, ensuring safe and hygienic contact with edible products.
- **Non-Stick Surface:** Its superior non-stick characteristics make it ideal for handling candy and other sticky confectionery items, significantly reducing clean-up time and enhancing work efficiency.
- **Durability:** Fabricated to withstand the rigors of a professional confectionery environment, this material is strong, robust, and designed for longevity.
- **Semi-Rigid Structure:** While the SC01 possesses a semi-rigid form, it is designed for flat or gently curved surfaces.
- **Ease of Maintenance:** The cloth's surface is exceptionally easy to clean, requiring minimal effort to wipe down after use, thereby maintaining a pristine work environment.
- The material can be supplied to your preferred dimensions.
