

## HAND FEED FOLD WRAPPING MACHINE – FW01

### FOR FOLD WRAPPING PRE-FORMED CANDIES

The FW01 Hand Feed Fold Wrapping machine is designed for the automatic wrapping of pre-formed candies. It's suited for various product shapes such as cubes, squares, oblongs, and rectangles with flat bottoms.

The machine includes a chain infeed system with an extended operator table. The table is used for sorting and hand feeding product directly into the chain infeed. This system is suited to products that don't feed well by vibration. If you have a product suitable for vibratory feeding then please check our auto feed model.

The machine creates a single point under fold wrap and can wrap at speeds of up to 300 pcs per minute. The machine includes a print registration unit for automatic alignment of printed films.

### FEATURES
