

MINI CANDY ROTARY FORMING MACHINE

THIS FORMING MACHINE IS IDEAL FOR LOW VOLUME OUTPUT OF PERFECTLY FORMED CANDIES.

Designed specifically for people requiring smaller production outputs, the machine will produce perfectly formed candies in rounds, ovals.

The machine utilizes a continuous rotary die which forms a candy rope into perfectly formed candies in your preferred shape. The machine has been designed to be extremely robust ensuring a reliable and long lifetime. Manufactured from stainless steel.

Each product requires its own separate die, die changes are quick and simple.

Machine body and all contact parts are made from food grade materials. The die speed is fully variable via inverter control and the machine will typically produce around 50Kg per hour of candies (subject to the size of your sweet)

The machine will ideally need feeding from a mini batch roller and rope sizer along with a cooler to make a complete mini candy manufacturing line. This machine is supplied with one forming die, comes on a stainless steel base and has lockable castors on the base of the stand.

FEATURES

- Output of around 50Kg per hour
- Variable speed via inverter control
- Quick and simple to change over dies
- Very simple to operate, maintain & clean

OPTIONS

- Extra forming dies
