

MINI CANDY ROPE SIZER-RS02

TWO STAGE MINI CANDY ROPE SIZER IDEAL FOR USE IN LABORATORIES, SMALL SCALE PRODUCTION OR DEMONSTRATIONS WHERE A CONTINUOUS ROPE OF CANDY IS REQUIRED OF A CORRECT SIZE

The Loynds mini candy rope sizer is the perfect addition to your small-scale candy manufacturing set up. The machine perfectly complements and automates other equipment available from our laboratory range or assists the production of products made by hand from ropes of candy.

The machine can be used for rope sizing both candy and caramel & some soft candy products.

The rope sizer is of a robust design manufactured in 304 stainless steel construction with a glass bead finish. The machine is driven via a motor gearbox unit with an electronic variable speed unit.

The sizing consists of 2 pairs of changeable sizing rollers as standard. Different rollers can be supplied to suit requirements. They will reduce the candy rope from a larger diameter to a smaller diameter.

Each set of rollers can be independently adjusted via a hand wheel located above each roller.

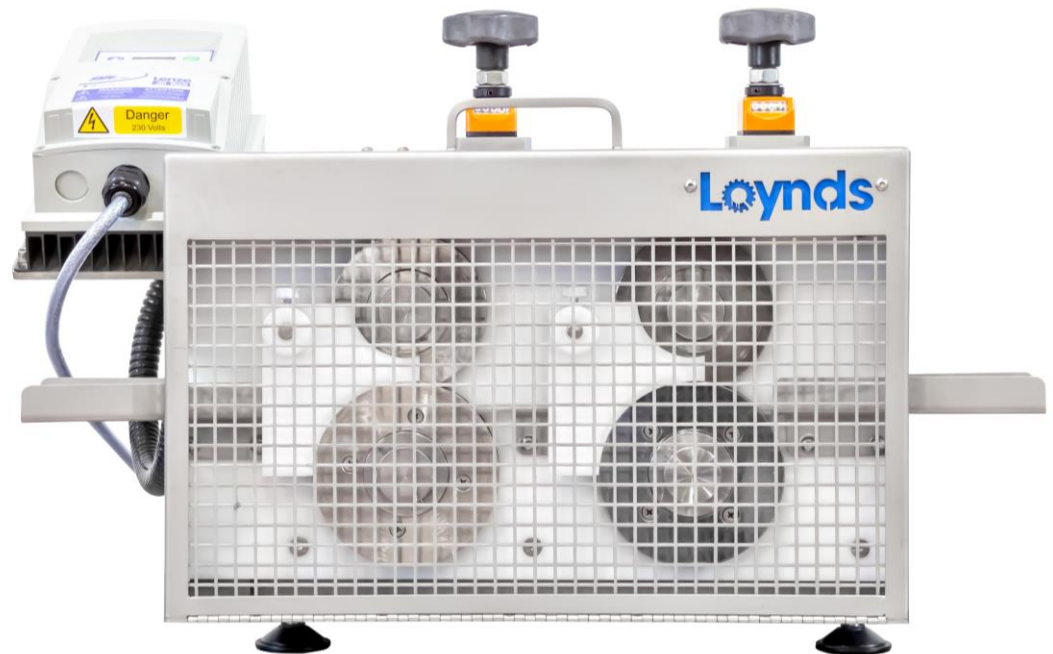

The machine is normally table mounted but if required can be supplied on a separate floor stand.

FEATURES

- Variable speed
- Easy to use, maintain & clean

OPTIONS

- Stainless Steel Floor stand
- Castors
- Extra sizing rollers
- Rope Control Unit
