

## DOUBLE TWIST WRAPPER WITH VIBRATORY AUTO FEED – TWO1

### FOR HIGH EFFICIENCY WRAPPING OF A WIDE ARRAY OF SWEETS AND CONFECTIONERY ITEMS IN THE CLASSIC DOUBLE TWIST WRAP STYLE

The Double Twist Wrapper with Vibratory Auto Feed is designed for medium to high volume wrapping of various confectionery products like chocolates, boiled sweets, fudges, and caramels. Its integrated vibratory feeding system means the machine requires minimal operator intervention. A single operator can manage multiple machines.

The vibratory feed mechanism ensures a steady, automated flow of products into the machine, making it especially suited for high-volume operations. A sensor positioned over the feed disc regulates the timing of the vibratory candy feed tray, optimising product flow. The machine features a no-product-no-paper system to minimise paper waste.

### FEATURES

- Double paper feed reel holder for quick reel changeover.
- Print registration device to align printed film onto the wrapped product.
- Air-assisted paper feed system.
- Optical sensor for 'no product, no film' detection to save paper.
- Lexan clear guards for enhanced operator safety.
- HMI control system
- Wrapping film length is changed by a keypad and stepper motor.
- Self-contained lubrication system.
- Product Dimensions:
  - Length: 12 – 34mm
  - Width: 12 – 34mm
  - Height: 6 – 20mm

## DOUBLE TWIST WRAPPER WITH VIBRATORY AUTO FEED – TWO1

### SPECIFICATIONS

**Overall Height:** 1500mm

**Product Dimensions:**  
(Length)12-34mm (Width)12-34mm (Diameter) 6-20mm

**Power:** 13Kw

**Overall Length:** 1790mm

**Material:** Painted steel Frame, Stainless Steel Contact Parts

**Speed:** 450 per minute depending on product and feed

**Overall Width:** 915mm

**Weight:** 900Kg

**Products:** Hard candy, rounds, ovals, squares
