

AUTO FEED FOLD WRAPPER FOR PRE FORMED CONFECTIONARY

FOLD WRAPPING MACHINE FOR PRE-FORMED CANDIES WITH VIBRATORY AUTO FEED SYSTEM

The FW02 Fold Wrapping machine is designed for the automatic feeding and fold wrapping of pre-formed candies. It's suited for various product shapes such as cubes, squares, oblongs, and rectangles with flat bottoms. Product is loaded directly into the hopper of the vibratory feeder. A sensor then controls the feed of product into the feed plate.

The machine creates a single point under fold wrap and can wrap at speeds of up to 300 pcs per minute. The machine includes a print registration unit for automatic alignment of printed films.

FEATURES

- **Speed:** wrap up to 300 candies per minute.
- **Automatic Feed Model:** Includes a vibratory feeder and a feed plate for auto feeding of product into the wrapping head.
- **Print Registration Unit:** For aligning printed films onto the product
